EDUCATION

University of Toronto

Honours Bachelor of Science, Mathematics & Physics | *Minor in Statistics*

Toronto, ON

August 2025

BrainStation

Data Science Diploma | *Intensive industry program in Python, ML, and predictive modeling*

Toronto, ON

March 2026

TECHNICAL SKILLS

Programming: Python, SQL, R

Data Science: Machine Learning, Predictive Modeling, Statistical Modeling, Feature Engineering, Cross-validation, SHAP

Explainability, Model Deployment, REST APIs

Tools: Excel (Advanced), Google Sheets, PowerPoint, LaTeX, Tableau, Git/GitHub, Neon, Render | **Languages:** English, Turkish

PROJECTS

Credit Card Customer Churn Prediction & Retention Strategy

May 2026

PostgreSQL, XGBoost, SHAP, FastAPI, Streamlit | Live demo: tarduak-bank-churn.streamlit.app

- Built end-to-end churn pipeline on 10K credit card customers — SQL feature engineering with CTEs and window functions, three-model comparison reaching 0.99 ROC-AUC with XGBoost, and SHAP explanations for individual predictions
- Optimized decision threshold using retention cost vs customer LTV instead of default 0.5, and built a customer segmentation matrix mapping risk and value to retention actions
- Deployed FastAPI prediction service to Render and interactive Streamlit dashboard to Streamlit Cloud, communicating via REST across the public internet

Student Performance Predictor

March 2026

scikit-learn, pandas

- Built cross-validated linear regression model on 6,600+ student records, achieving R^2 of 0.73
- Found hours studied was the strongest predictor of exam scores, outweighing socioeconomic and environmental factors

PROFESSIONAL EXPERIENCE

RM Istanbul

Istanbul, Turkey

Operations Data Analyst Intern

Nov – Dec 2025

- Analyzed 12 months of 2025 field operations data in Python and Pandas, ranking team efficiency and identifying average install times by gas station brand for management
- Built a mobile web app for site workers to log in/out and upload completion photos — deployed on Netlify with Google Sheets integration, replacing manual reporting workflow

MDT Engineering Systems Co.

Istanbul, Turkey

Supply Chain Data Analyst Intern

May – Jul 2022

- Delivered quantitative analysis on supply chain operations, with findings reviewed and acted on by senior management to inform operational improvements

ACTIVITIES & LEADERSHIP

UofT Turkish Student Association Toronto, ON

Events Director

2023 – 2025

- Led end-to-end planning, budgeting, and promotion of cultural events, steadily growing attendance through targeted community outreach

VOID

Istanbul, Turkey & Amsterdam, Netherlands

Co-Founder

2022 – 2024

- Co-founded international techno event brand, booking headline DJs and producing large-scale events of 400+ attendees

TWITCH

Online

Content Creator (Twitch)

2016 – 2020

- Founded a channel to 15,000+ followers and 1,000+ concurrent viewers as a top 0.01% ranked LoL player over 3 years
